How to view grades

Moodle allows you to view your grades during the semester for each assignment, however it is up to each instructor to allow you to see the grades or not. You need to check that with your instructor for each grade.

To view the Grades you need to go to the Administration block which is from the left and click on Grades.

You can see all your grades in one place. You can change the view from User report to Overview report.

If you choose User report you will see all your grades for the class you are currently enrolled. Overview report will show you the cumulative grade for all your classes.
